

TO BE UPDATED.

Overview:

Personal Finance Dashboard is a lightweight finance tracker that helps users understand and control their spending on a regular basis. Users log daily expenses within categories, and the dashboard will automatically visualize the monthly budget usage, spending trends over time, and whether they are on track against their specific budget goals. Recurring payments, such as rent, utilities, subscriptions, etc. are also factored in automatically once set by the user, so the budgets reflect the users' real, ongoing financial commitments.

Features:

1. Daily expense logging with customizable categories
2. Monthly budget overview with a breakdown as per category
3. Spending trend visualization via graphs over time
4. Over/under budget indicators and alerts
5. Recurring payment tracking
6. (Planning) Multi-currency support via live exchange rate API
7. (Planning) Exporting reports of spending history
